

PDD Template

Table of Contents: • Feature Overview • Executive Summary • Scope and Specifications • User Experience & Design • Technical Requirements • Competitor Analysis • Roadmap & Timeline • Go-To-Market Strategy & Enablement • Success Metrics & KPIs • Appendix	Feature Overview	
	Feature name	<i>If a Product, approval is required by Naming Committee</i>
	Product Manager	[insert name]
	Product Designer	[insert name]
	Engineering Manager	[insert name]
	Feature(s) on Jira	[add link]
	Technical Design Definition	[add link to TDD]
	Product Design Artifacts	[add link to Figma]

Executive Summary

Purpose of the Product or Feature	Brief description of what the feature does and why are we building. How does it align with our strategy and desired market segment?
Keywords	• Acronym/Phrase #1: Include Definition • Acronym/Phrase #2: Include Definition • ...
Target Audience	Who is the target persona? agent, admin, etc.
The Job	What is the customer's job to be done?
The Pain	What is the customer's pain?
The Gain	Summarize how the product/feature solves the identified customer pain points. Provide examples in the user stories section below

Critical Change	- Does this new feature dramatically impact the way the customer interacts with the product? See the definition of critical change. - Will another product/feature be deprecated as a result?
------------------------	--

Scope and Specifications

Core Functionalities	List key functionalities with descriptions.
Non-Core Functionalities	Nice-to-have or future functionalities.
Roles & Permissions	Explain if users will require specific permissions for access.
Out of Scope	Explicitly state what is NOT included.
Assumptions & Constraints	Technology, budget, legal, etc.
Limitations	Call out any known limitations and possible workarounds to overcome the limitations/gaps. e.g. is a partner required or is a customer required co-built?

User Experience & Design

- User Stories

User Story	Description	MoSCoW
Should follow the format: As a [persona] I want [goal] so that [reason].	Used if more explanation of the requirement is needed.	Represents the importance of the user story and will be one of the following values:

		MUST HAVE COULD HAVE SHOULD HAVE WON'T HAVE
--	--	---

- Mockups

Include a mockup to visualize the design in context.

- Customer journeys

Show the end-to-end experience for a customer.

Technical Requirements

Architecture Diagram	Add an image or the link to the document/wiki page here
3rd Party Vendors	List the vendor’s name and if it’s required to work directly with the vendor (e.g., Nylas, ScreenMeet, E911).
Security & Compliance	List any impact on security and compliance e.g. GDPR, HIPAA, etc
Dependencies	List known dependencies on other Talkdesk teams or third parties including partners and customers: - Dependency #1 Responsible party Jira link - Dependency #2 Responsible party Jira link

Competitor Analysis

For whom are we creating value? Who are our most important customers? Is this aligned with an industry opportunity?

Do competitors have something similar? What differentiates us? See the table below.

Product/Feature	Competitor #1	Competitor #2

Roadmap & Timeline

Release Milestones & Timeline	Release type Estimated release dates Major milestones or phases (ex. Ascend Connect Phase 1, 2, 3, etc)
Risks	Identify possible risks affecting delivery. These could be usage, technical, design/UX, dependency risks, adoption, GTM, etc.

Go-To-Market Strategy & Enablement

PMs to host regular live enablement sessions (walk-throughs, demos, Q&A) for [GTM SMEs](#).

Rollout Plan	Describe how the feature will be introduced to users. • Progressive rollout full deployment • Regions affected • Will we be selling through a direct salesforce, through partners, or via e-commerce? • Will this require the involvement of third parties to support the rollout? (e.g., Verint WFM)
Provisioning	• What customer information is necessary to configure the product/feature correctly? e.g., expected volume, specific integration/API/version requirements, languages to be supported, etc. • Does the product/feature need Talkdesk setup before use, e.g., Studio variables, virtual agents? If so, list the steps. • What are the steps to activate the product/feature in an account? e.g., Automated or dependent on P&E.

Configuration	• Product/feature configuration guidance, if any. • List if there are any specific use cases or features that require extra testing to ensure proper configuration. • Point to the internal test account with an example of the “best in class” configuration.
Support & Troubleshooting	Describe troubleshooting and common errors for both customers and internal Talkdesk Support Representatives. Please add the link to the supporting documentation when available.
Pricing & Monetization More info here	• Will this product/feature be monetized? Will it be licensed or usage-based? • Will there be changes to pricing such as SKUs update?

Success Metrics & KPIs

KPIs	Describe how success will be measured for this feature. Adoption, retention, usage, revenue, etc
Customer Feedback Mechanisms	Surveys, reviews
